

ARCHIMATE CERTIFICATION

ARCHIMATE® 3.2 SPECIFICATION TRAINING

PROGRAM OVERVIEW

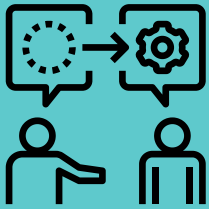

Thank you for considering Knotation for your ARCHIMATE® Certification Program needs. As a South African-based consulting company, Knotation specializes in customized training and professional services tailored to meet your operational requirements.

WHY CHOOSE KNOTION?

Pioneers in global ARCHIMATE® training, we bring unparalleled expertise to clients worldwide. With a focus on impactful learning, our seasoned architects deliver practical insights, shaping successful careers.

OUR REACH AND CLIENTELE

We conducted training in various countries including Australia, Rwanda, Nigeria, Austria, and Egypt. Our clients include prominent organizations like Transnet, Nedbank, South African Reserve Bank, Alexander Forbes and more.

TRAINING METHODOLOGY

Our courses are structured for optimal comprehension and knowledge transfer. We use a varied approach catering to different learning styles: visual, verbal, and auditory. We make use of online platforms, video clips, case studies, group discussions, and mock exams.

COURSE MATERIAL AND CERTIFICATION

Our training package includes comprehensive training material, an attendance certificate, and covers examination costs.

Additionally, we provide preparation guidance and exam instructions as part of the course.

OUR TRAINERS

The Knotation trainers are experienced architects and ARCHIMATE® experts. There is a strong emphasis on engaging delivery and interactive sessions. Our trainers receive high ratings for sociability and effectiveness from students.

ABOUT ARCHIMATE®

ArchiMate® is an open and independent graphical modelling language for Enterprise Architecture. It is an international, vendor-independent standard of The Open Group, liberating you from the lock-in of vendor-specific tools and frameworks.

The success rate of your enterprise architecture effort is dramatically increased when the use of ArchiMate® is correctly and efficiently addressed within your organisation, and we will provide you the case studies to prove this.

COURSE OUTCOME

By the training's conclusion, delegates will possess a strong foundation in ArchiMate®, expertise in modeling and describing architectures using the language, and proficiency in visualizing architectures through ArchiMate® techniques.
